Audit Log

Updated 6 months ago

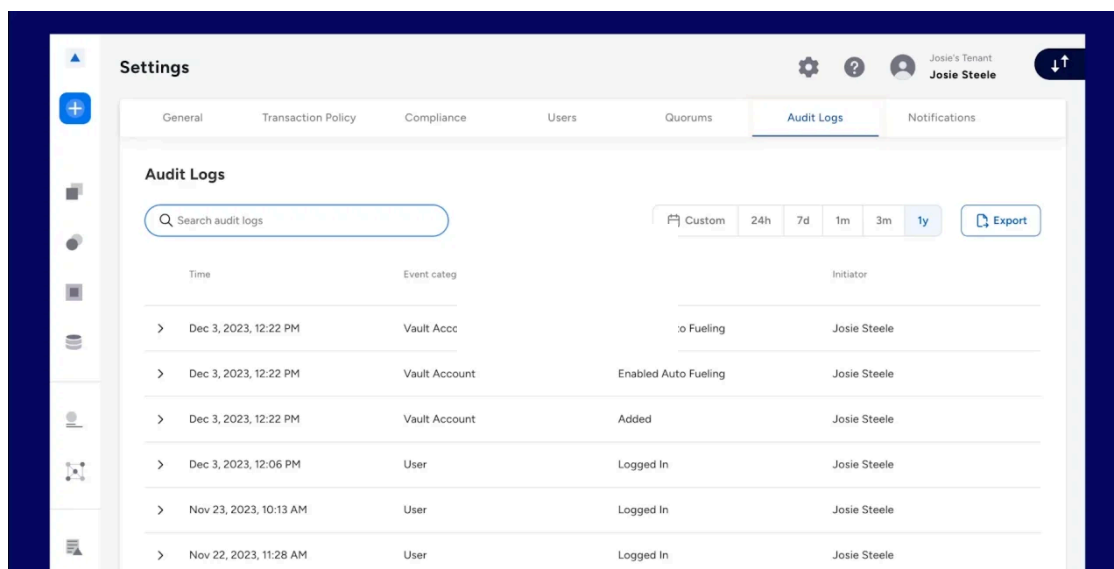

Requires Admin-level permissions

Only Owners, Admins, and Non-Signing Admins can access the Audit Log.

Overview

The Audit Log enables you to track, audit, and export your workspace events. All events can be [sent as notifications](#). The Audit Log supports the workspace events listed at the bottom of this page.

Events that are recorded in your Audit Log do not expire. You can view the full history of events in your workspace from when it was first created.

0:30

Viewing the Audit Log

In the Fireblocks Console, go to **Settings**  > **Audit log**.

 Fireblocks Help C

- To filter for specific events, select  in the appropriate column header.
- By default, events are listed with the most recent events listed first. Select  in the appropriate column header to change the sorting order.

Viewing Audit event details

Select **>** on the left side of any event to view additional information about the event.

Each row of the Audit Log is an independent event that includes the creation time, subject, event description, and the user or entity that triggered the event.

Exporting Audit events

Go to **Settings**  **> Audit log** and then select **Export** .

Downloading reports requires authentication

You must sign in to the workspace to download the report you requested.

Indexing Audit events

Learn more about [Fireblocks API endpoints](#) that you can use to directly integrate with your security information and event management (SIEM) system.

Audit Log categories and events

This is a comprehensive list of all Audit Log categories, related subjects, and events.

Administration
