Override the DCCP for specific transactions

Updated 1 year ago

Admins can manually set the confirmation threshold of a specific transaction using one of the following methods:

- [The Fireblocks Console](#)
- The Fireblocks API, by either the [transaction's Fireblocks ID](#) or its hash

If you attempt to set a transaction's confirmation threshold [outside the limitations](#) via the API you will receive the following error code:

`400 1444 TRANSACTION_CONFIRMATIONS_NOT_COORDINATED_WITH_FIREBLOCKS_RES`
