Re-enroll a user's mobile device

Updated 2 days ago

Admin-level users can re-enroll another user's mobile device from the Fireblocks Console when the user needs to re-link their device to the workspace. A user may need their device re-enrolled if they:

- Changed their device's biometric settings
- Uninstalled the Fireblocks mobile app
- Installed the Fireblocks mobile app on a new device
- Forgot the 6-digit PIN they set up for the Fireblocks mobile app

Re-enroll a non-Owner device

Note: If other users or workspaces are linked to the device, they must each be re-enrolled individually.

To re-enroll a user's mobile device:

1. In the Fireblocks Console, go to **Settings > Users**.
2. Find the user, then select the more actions menu (:) > **Re-enroll mobile device**.

An approval request is sent to the workspace Owner. After the Owner approves, the user logs in to the Fireblocks Console, scans the on-screen QR code with the Fireblocks mobile app, and follows the in-app instructions to complete re-enrollment.

If the user has signing privileges, the Owner must re-approve the user's Multi-Party Computation (MPC) key shares within two days of the user re-enrolling their device. Once the Owner approves the new MPC key shares, the user has two days to complete MPC registration.

Re-enroll the workspace Owner's device

Re-enrolling the workspace Owner's mobile device requires Fireblocks Support and cannot be done through the Console. [Contact Fireblocks Support](#) to start the process. This applies even if the user is the Owner of a different workspace.
