Transfer workspace Owner

Updated 2 days ago

Transferring the workspace Owner role requires Fireblocks Support and cannot be done through the Console. Support follows a specific verification procedure to ensure the safety and security of the workspace.

Before you begin

Before requesting a transfer, confirm that:

- The new Owner has the [Admin or Signer role](#).
- The new Owner is [fully onboarded](#), including having generated their Multi-Party Computation (MPC) key shares.
- Your active [Policies](#) allow the new Owner to sign transactions.

Important: If the current Owner created a [Workspace Keys Backup](#), your organization should decide before the transfer whether to keep or destroy it. If destroyed, the new Owner should create a new backup encrypted with their recovery passphrase.

Submit the request to Support

Submit a [request to Fireblocks Support](#) with the following information:

- The exact workspace name
- The current Owner's name and workspace email address
- The new Owner's name and workspace email address

After you submit the request, both the current Owner and the new Owner schedule a short video call with Fireblocks Support to verify their identities and approve the transfer. The new Owner must also [verify their recovery passphrase](#).

The full transfer takes approximately three to five business days. See the [SLA guidelines](#) for more.

If the current Owner is unavailable

If the current Owner cannot participate in the transfer, a quorum of stakeholders from your company's board must contact Fireblocks Support with an official board resolution
