Identity & Compliance

Travel Rule: Notabene

About the Travel Rule

Note

- The Travel Rule integration is a premium, opt-in feature that requires an additional purchase. Contact your Customer Success Manager for more information.
- The Compliance Policy Editor workflow is a new feature that will be available to all customers soon. Contact your [Customer Success Manager](#) to enable it in your Fireblocks workspace and for assistance with setting up the integration.

The [Financial Action Task Force \(FATF\)](#) recommended the Travel Rule in order to combat money laundering and terrorist trafficking activity. The rule states that Virtual Asset Service Providers (VASPs), which include businesses that exchange virtual assets, must provide additional data on the senders and recipients of certain transactions. Each jurisdiction decides which transactions must adhere to the Travel Rule and what data must be included.

Important

Fireblocks does not permanently store any transaction data needed specifically for the Travel Rule. All Travel Rule data is encrypted and stored with Notabene if needed. Fireblocks does not hold the keys for decrypting the information.

To help you comply with the Travel Rule, Fireblocks provides integration with Travel Rule provider [Notabene](#). Notabene analyzes your incoming and outgoing transactions in real time and screens them based on your workspace's Travel Rule policy. After Notabene screens a transaction and determines its compliance with the Travel Rule, the appropriate action can be taken automatically.

After integrating Notabene with your Fireblocks workspace, you can configure and manage various settings and policies. In your Notabene dashboard, you can configure settings
