Hosted MPC Workspace Configuration

Updated 1 year ago

When you request to own and manage all of your MPC signing keys, Fireblocks creates a workspace with a “Hosted MPC” tag for you. The onboarding process requires careful planning of the Co-Signer’s deployment, so it is necessary to work closely with our customer support staff. [Contact your Customer Success Manager](#) to learn more about the process.

Note:

You must open and configure a new workspace for a Hosted MPC setup, as modifying an existing SaaS MPC workspace is impossible.
