Backup & Recovery

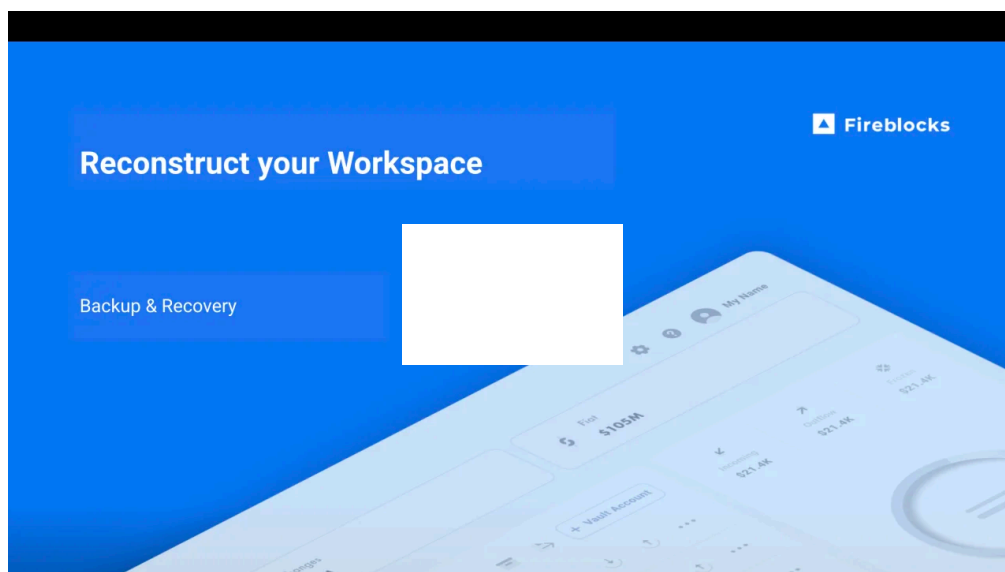

Native workspace key backup solution

Reconstructing your workspace

Overview

Reconstructing your workspace provides you with a simple way to verify individual addresses and access all your funds after a disaster occurs.

You can reconstruct your workspace in one of two ways: manually, or using an automated process.

2:13

Manual reconstruction

To reconstruct your workspace manually:

1. In the Recovery Utility, go to the Accounts page and select **+ Create Vault Account**.

/

the vault account's ID in the breadcrumbs at the top of the page. Vault account IDs are incremental, starting from zero.

Automated reconstruction

Important

- This procedure should only be performed if you have already generated and verified your recovery package.
- You need to authenticate into the workspace from which you want to download the Vault report.

To perform an automated reconstruction:

1. In the Fireblocks Console, go to **Accounts > Vault** and then select **Export vault report** .
2. Download the CSV files, then find the **addresses_report_XXXXXXXXXXXXX.csv** file. The epoch unix timestamp in milliseconds will be appended to the filename."
3. In the Recovery Utility, select **Import/Export** on the left menu.
4. In the **Address Data** field, drop or select the CSV file you found in Step 2.
5. Select **Import**.

Reconstructing asset wallets

To reconstruct a vault account's asset wallets:

1. In the Recovery Utility, go to the **Accounts** page and select **+ Create Wallet**.
2. Select the desired asset from the list.
3. Select **Recover**.

This creates the asset wallet in the vault account, which you must then verify using one of the methods below.
