Identity & Compliance

Travel Rule: Policies

Travel Rule compliance for exchange transactions

Console UI access is limited

Access to the Binance, Bitstamp, and Bitfinex UI flow is currently available on an opt-in, customer-needs basis. API flows are now available for all customers.

Overview

Major exchanges, including Binance, Bitstamp, and Bitfinex, have introduced regulatory requirements under the Travel Rule. This mandates the collection of Personally Identifiable Information (PII) for certain crypto deposits and withdrawals. To ensure compliance, the specific personal information required varies based on the exchange and the regulatory requirements of your local entity (jurisdiction). Note that Binance US is not affected by this change.

To meet these requirements securely, Fireblocks utilizes end-to-end encryption. The personal data is transmitted through an enhanced API using Fireblocks' Exchange Service Public Key. This guarantees the information remains encrypted until it is decrypted, processed, and submitted as part of the withdrawal or deposit request by the Exchange Service, adhering to the requirements of the specific exchange (e.g., Binance or Bitstamp).

How it works

1. In the Fireblocks Console, select **Transfer** on the left navigation pane.
2. In the **From** or **To** fields, select **Binance**, **Bitstamp**, or **Bitfinex** (only in **From**).
3. Choose from one of the options below.

/

The screenshot shows a 'Transfer' dialog box with the following fields and options:

- Asset:** BTC (Bitcoin) Bitcoin
- From:** Binance
- Compliance Section:**
 - Binance Travel Rule Compliance** (with an 'Add details' button)
 - Please provide additional info.
 - ☐ I acknowledge that skipping these details may result in a blocked transaction.
- To:** Choose a source
- Set amount:** 0
- Internal note (Optional):** Add a note
- Transfer** button with a shield icon

Follow the prompts on the Travel Rule details dialog based on your local entity and ensure all required parameters are verified for accuracy and completed in full.

Choose a country

City

Choose a city

Sending to

☐ Exchange or Provider

☒ Private wallet

VASP Code

VASP of the beneficiary

VASP Name

Enter VASP name

☐ Confirm the information provided is accurate and compliant.

Cancel

Save

Once done, select **Save** and then complete the transaction as you normally would.

Option 2: Skip providing personal information

Select the **I acknowledge** checkbox to confirm that you understand skipping the personal information step may result in the transaction being blocked, and complete the rest of the transaction details. Proceeding this way sends a standard transaction without the additional data.

The screenshot shows the Fireblocks transaction interface. At the top, there's a search bar with the text "Fireblocks Fireblocks Help Center" and a search icon. Below this, the transaction details are displayed:

- From:** A dropdown menu with the text "Choose a source".
- To:** A dropdown menu showing "Binance" with the Binance logo.
- Net amount:** A field showing "0.000001 BTC" and "\$0.11". Below this, there are tabs for "Net" and "Gross", and a checkbox for "Max (567 BTC)".
- Tentative Fee:** A field showing "2.4" and "SAT/BYTE". Below this, there are tabs for "Slow", "Medium" (selected), "Fast", and "Custom".
- Internal note (Optional):** A text area with the placeholder "Add a note".
- Transfer:** A large blue button with the text "Transfer" and a shield icon.

Important

While providing personal information is optional, doing so can reduce the risk of transaction delays or failures and help ensure regulatory compliance.

Binance troubleshooting failed or blocked transactions

In the event transactions are failing or appear frozen on Binance:

- **Withdrawals:** If a withdrawal fails, you may be required to complete a [withdrawal PII questionnaire](#) on the Binance platform.
- **Deposits:** If an incoming deposit is delayed or temporarily frozen, you may be required to complete a [deposit PII questionnaire](#) on the Binance platform.
