Using Tags for vault management

Updated 8 months ago

Tags help you organize and manage your assets within the Fireblocks platform. By grouping related assets with custom labels, you can filter, locate, and work with specific sets of vault accounts.

Creating and managing Tags

To create a tag in a vault account:

1. In your Console's left panel, select **Accounts**, then select **Vault**.
2. Hover over the relevant vault account, and under the Tags column, select the "+" sign.
3. In the Tags modal, enter your new tag name, and select **Create [name] tag**.
4. Select a color for your tag, enter an (optional) description, and select **Create tag**.

To edit or remove existing tags:

1. In your Console, select the Settings icon.
2. Select the **Tags** tab.
3. Hover over the relevant tag entry, and select the pencil icon to edit the tag, or the trashcan icon to remove it.

Smart Filtering

Once you've tagged your vault accounts, use the applied filter option to quickly view specific groups of assets based on their tags.

Advanced tag management

Admins, Non-Signing Admins, or Owners can view and manage their tags via the Tags tab.

API First

Tags are fully supported on both the Fireblocks Console and API, giving you flexible options for integration into your existing workflows.

DELETE

/tags/{tagId} Delete a tag

POST

/vault/accounts/attached_tags/attach Attach tags to a vault accounts

Attach one or more tags to the requested vault accounts.

Parameters

Try it out

Name	Description
Idempotency-Key string (header)	A unique identifier for the request. If the request is sent multiple times with the same idempotency key, the server will return the same response as the first request. The idempotency key is valid for 24 hours.

Idempotency-Key

Request body required

application/json

Example Value | Schema

```
{  "tagIds": [    "df4c0987-30da-4976-8dcf-bc2dd41ae331",    "a1b2c3d4-e5f6-7890-abcd-ef1234567890"  ],  "vaultAccountIds": [    "0",    "1"  ]}
```

Responses

Code	Description	Links
204	Tags were attached successfully	No links

POST

/vault/accounts/attached_tags/detach Detach tags from a vault accounts

Text

Notes:

1. The API endpoints are in beta and may include breaking changes in future releases.
2. Vault filtering by tags is currently only available in the console. API support will be added soon.
