Bithumb account

Updated 8 months ago

Configuring your Bithumb account

To configure your Bithumb account to connect to Fireblocks:

1. Refer to the [Bithumb.com API Documentation](#) to learn how to generate an API key.
2. When prompted, name your new API Key "Fireblocks."
3. After you confirm the validity of your new API key, copy and keep a record of both the API Key (Connect Key) and API Secret (Secret Key). You will need them when adding this exchange to your workspace.
4. Make sure you check **Activation** in the following checkboxes:
 - **Member's wallet information**
 - **Orders**
 - **Cryptocurrency Withdrawal**
5. Under **Setup for IP and withdrawal address restriction**, in the **Setup the accessible IP** field, add the following IP address: 52.76.208.129.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.
2. Select **+ Connect Account**.
3. Select **Bithumb**, select **Main Account**, and then complete the following fields:
 - a. **Name on Fireblocks**: Enter the name you want to give this exchange account on Fireblocks.
 - b. **API Key**: Enter the API key that you saved from Bithumb.
 - c. **API Key Secret**: Enter the Secret key that you saved from Bithumb.
 - d. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.
