Cancel a transaction

Updated 8 months ago

Overview

Canceling a transaction stops it in its current status and allows any associated assets to be used in new transactions.

Important

When you cancel a transaction, the status "Canceling" is NOT final. You must wait for the final status - "Canceled" - before resending the transaction.

Transactions in these primary statuses can be canceled:

- Submitted
- Pending authorization
- Pending signature
- Queued

Note

Workspaces created before 2021 or with beta features enabled may not display the **Cancel** option for relevant transactions. Contact [Fireblocks Support](#) to request the cancel feature in your workspace.

When should I cancel a transaction?

- If a transaction remains in one of these statuses for a long time, it may indicate an issue with the transaction. When this occurs, you can cancel the transaction and then resubmit it.
- If a transaction is pending authorization or signature, confirm that all required users are available and have received a notification to authorize or sign the transaction. If a user is unavailable, cancel the transaction. Review your Policy rules to see if you
