Coinhako account

Updated 8 months ago

Configuring your Coinhako account

To configure your Coinhako account to connect to Fireblocks:

1. Generate Coinhako API key and secret. If you are unsure how to do this, [contact Coinhako support](#).
2. When prompted to do so, name your new API Key "Fireblocks."
3. After you confirm the validity of your new API key, copy and keep a record of both the API Key and API Secret. You will need them when adding this exchange to your workspace.
4. Make sure you enable at least the following permissions out of the existent options:
 - **Read**
 - **Wallet**
5. Under IP access restrictions, delete the 0.0.0.0 address, and then add 52.76.208.129 instead.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.
2. Select **+ Connect Account**.
3. Select **Coinhako**, select **Main Account**, and then complete the following fields:
 - **Name on Fireblocks:** Enter the name you want to give this exchange account on Fireblocks.
 - **API Key:** Enter the API key that you saved from Coinhako.
 - **API Secret:** Enter the Secret key that you saved from Coinhako.
4. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.
