Coinhako sub-account

Updated 1 year ago

Overview

Fireblocks supports Coinhako sub-accounts via exchange connectivity. Connect the exchange, and rebalance securely between your exchange's main account and sub-accounts on Fireblocks.

Important:

- If you already have a Coinhako sub-account connected to this workspace, you must remove it and then reconnect it.
- If you have a Coinhako main account connected, you may need to remove it if the email field was left blank.

Configuring your Coinhako sub-account

To configure your Coinhako sub-account to connect to Fireblocks:

1. Create and keep a record of both the sub-account API Key and API Secret. You will need them when adding this exchange to your workspace.
2. Under IP access restrictions, delete the 0.0.0.0 address, and then add 52.76.208.129 instead.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **Coinhako**, select Sub account, and then complete the following fields:
 - **Account Name:** Enter the name you want to give this exchange sub-account in your workspace.

/

4. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your Coinhako sub-account appears on the Exchanges page along with all managed assets and their balances. Following Admin Quorum approval, transfers will be available between this sub-account and its Coinhako main account.
