Creating On/Off-ramp orders

Updated 2 months ago

Overview

Orders can be fiat-to-digital asset, digital asset-to-fiat, or digital asset-to-digital asset swaps, depending on each provider. Orders are typically between fiat currencies and stablecoins, or conversions between stablecoins (swaps). [Learn more about swaps between digital assets.](#)

On-ramp: fiat to stablecoin order

The following steps outline how to initiate an on-ramp payment instruction:

1. **Create an on-ramp order from an external source:**
 - a. From the transfer modal +, select **On/Off ramp**.
 - b. Select an external bank account and specify the desired fiat currency.
 - c. Select the destination and the stablecoin for the on-ramp order.
 - d. Select the provider account if more than one is available.
 - e. Select **Create Order**.

The screenshot shows the Fireblocks mobile app interface for creating an on-ramp order. At the top, there's a search bar with the Fireblocks logo and the text "Fireblocks Help Center". Below this, the app shows a form with the following fields:

- Source:** External account (with a dropdown arrow)
- To:** A dropdown menu showing "USDC (USD Coin)" and "Ethereum". To the right of this menu, the amount "54.464" is displayed.
- Destination:** Treasury (with a dropdown arrow). To the right, the balance "Balance: 225.5521" is shown.
- Via:** A dropdown menu showing "Account Mertie25@hotmail" and "Alfred Pay".

At the bottom of the form, there is a link "Add participant identification information", a "Reset" button, and a "Create order" button with a checkmark icon.

2. Review, approve, and sign the transaction using the Fireblocks mobile app.
3. Once the order is approved and created by the provider, the payment instructions will appear on screen. You must then transfer the funds from your own bank account to the provider's bank account, as instructed.

The screenshot shows the "Order details" screen in the Fireblocks mobile app. At the top, there's a status bar "Awaiting payment" with a close button. Below this, the order details are displayed:

- Order type:** MXN to USDC
- Order ID:** bff1d...460dd

Below the order details, there are two tabs: "Payment Instruction" (selected) and "More Info". Under the "Payment Instruction" tab, the following account details are listed:

Account details	
Bank account number	684180125006242203
Account holder name	Cell Pay S.A.P.I de C.V
Country	MX
Reference ID	1CRX726

At the bottom of the screen, there is a note: "Use these payment instructions to initiate the transfer from your bank account".

4. The pending order appears on the Order History page with its current status.
5. Once the provider receives the funds, the order is then complete.

Pre-funded on-ramp

If a connected service provider supports pre-funded accounts (i.e. holding a balance), you can first transfer funds, as a pre-step to the order creation, that will remain in the provider's

/

1. Select the connected account and specify the desired fiat currency.
2. Choose the destination and the stablecoin for the on-ramp.
3. Review, approve, and sign the order using the Fireblocks mobile app or your API co-signer.
4. Fireblocks sends the instructions to the provider, keeping track of the order execution.
5. The order then becomes visible in the **Order History** page.

Off-ramp: stablecoin to fiat order

Depending on the provider, you can create digital asset-to-fiat orders via a connected account, with funds in your Fireblocks vault. Whitelist fiat bank accounts to select them as a destination. [Learn more about whitelisting fiat accounts.](#)

Create a digital asset-to-fiat order

1. Create a new transfer and select **On/Off ramp**.
2. Select the source vault and asset type, then choose a destination. Fiat destinations can be whitelisted fiat accounts or any provider that supports fiat transfers.
3. Select the connected account that will process the order.
4. When the service provider returns the commitment, approve and sign the outgoing transfer from your vault to the provider using the Fireblocks mobile app or your API co-signer.
5. Fireblocks tracks the order execution
6. The pending order appears on the Order **History** page with its current status.
