Creating a Smart Transfer ticket

Updated 1 year ago

Overview

You can open smart transfer tickets via the Console and API. Tickets can be one-way or two-way requests. To open a smart transfer ticket as an intermediary for other parties, you must [use the API](#).

Creating Smart Transfer tickets

The Smart Transfers window is dynamic and allows different options depending on your selections. To open a Smart Transfer ticket:

1. In the Active tickets area, select **+ Create ticket**.
2. Under Participants, select an **Initiator** Network profile where funds will be deposited, and the **Counterparty** profile to transact with.

Participants
Choose an initiator and counterparty network profile.

/

4. To create a two-way ticket, select the **Asset** and **Amount** for both Send and Receive funding sections.
5. If you want to add more than one asset, select **Add another asset** and select the asset type and amount. This option only becomes available once the previous asset and amount are entered.
6. Under the Expiration section, you can select an expiration time for the ticket, in hours. By default, the ticket never expires, and remains active unless it is funded or cancelled.

Expiration

The countdown will start after you open the ticket.

Tickets without an expiration never expire.

7. Under Note to connection, you may optionally enter text to inform your connection about any details relating to this transaction.
8. Select **External reference ID** to enter your internal system's ID for this transaction.
9. Select **Review ticket** to see a summary of the entire ticket, prior to submission.
10. Select **Send ticket** to create the ticket and notify both parties.
