Crypto.com sub-account

Updated 10 months ago

Overview

Fireblocks supports Crypto.com sub-accounts via exchange connectivity. Connect the exchange, and rebalance securely between your exchange's main account and sub-accounts on Fireblocks.

Important:

- If you have a Crypto.com main account connected, you may need to remove it if the email field was left blank.

Configuring your Crypto.com sub-account

See the [Crypto.com documentation](#) to learn more about creating a sub-account. To configure your Crypto.com sub-account to connect to Fireblocks:

- The Account Label given for this sub-account and the name on Fireblocks must match exactly.
- Create and keep a record of both the sub-account API Key and API Secret. You will need them when adding this exchange to your workspace.
- Under IP access restrictions, delete the 0.0.0.0 address, and then add 52.76.208.129 instead.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **Crypto.com**, select **Sub account**, and then complete the following fields:

Don't see what you're looking for? Log in for the full Help Center experience

 Fireblocks Help Center

/

- **API Key:** Enter the API key that you saved from Crypto.com.
- **API Secret:** Enter the API Secret that you saved from Crypto.com.

4. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your Crypto.com sub-account appears on the Exchanges page along with all managed assets and their balances. Following Admin Quorum approval, transfers will be available between this sub-account and its Crypto.com main account.
