Dismiss a transaction card

Updated 2 years ago

Dismissing a transaction removes the transaction card from the recent activity panel in the Fireblocks Console. Transaction cards are automatically cleared from the recent activity panel about 24 hours after reaching a final status.

Transactions with these statuses can be dismissed from the recent activity panel in the Fireblocks Console:

- Completed
- Canceled
- Blocked by policy
- Failed
- Rejected

Transactions with **Broadcasting**, **Confirming**, or **Pending 3rd Party** statuses or the COMPLETED_BUT_3RD_PARTY_FAILED and COMPLETED_BUT_3RD_PARTY_REJECTED substatuses are not automatically cleared from the Recent activity panel and can't be dismissed, even if they are stuck. Contact [Fireblocks Support](#) to clear these transactions if the other operations described in this article don't resolve the issue.
