Configuring your Kraken or Kraken International account

To configure your Kraken or Kraken International account to connect to Fireblocks:

1. Refer to the [Kraken.com API Documentation](#) to learn how to generate an API key.
2. When prompted to do so, name your new API Key "Fireblocks."
3. Copy and keep a record of both the API Key and Private Key. You will need them when adding this exchange to your workspace.
4. Set the Nonce Window to **10,000**.
5. Enable all Key Permissions for Funds:
 - **Query Funds**
 - **Deposit Funds**
 - **Withdraw Funds.**
6. If using Kraken in conjunction with our [Payments feature](#) to convert assets, enable these additional permissions:
 - **Query open orders & trades**
 - **Query closed orders & trades**
 - **Create & modify orders**
 - **Cancel & close orders.**
7. Optionally, whitelist the following IP addresses: **40.117.39.160, 40.87.67.58, 52.76.208.129**

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.

Complete the following steps:

- Name on Fireblocks:** Enter the name you want to give this exchange account on Fireblocks.
- API Key:** Enter the API key that you saved from Kraken or Kraken International.
- Private Key:** Enter the Private key that you saved from Kraken or Kraken International.
- Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your Kraken or Kraken International account appears on the Exchanges page along with all managed assets and their balances. Following Admin Quorum approval, transfers are available from your vault accounts, whitelisted addresses, Fireblocks P2P Network connections, and other connected exchange accounts to your Kraken or Kraken International account.

Enabling withdrawals from Kraken or Kraken International
