Luno account

Updated 7 months ago

Configuring your Luno account

To configure your Luno account to connect to Fireblocks:

1. Request an API key from [Luno.com](https://luno.com).
2. When prompted to do so, enter the following information:
 - a. In the Key label field, enter **Fireblocks**.
 - b. Under Permissions, select **Custom**.
3. Enable the following permissions:
 - **View balance**
 - **View transactions**
 - **Send to any address**
 - **View addresses**
 - **View orders**
 - **Create orders**
 - **View withdrawals**
 - **Create withdrawals**
 - **View beneficiaries**
 - **View transfers**
 - **Create transfers**
4. Do not select **Restrict send addresses**.
5. Select **Restrict IP addresses** and enter **52.76.208.129**
6. Optionally, select **Set expiry date** to require refreshing your API credentials.
7. Copy and keep a record of both the **API Key ID** and **API Secret**. You will need them when adding this account to your workspace.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.

Fireblocks Help Center

b. **API Key ID:** Enter the API Key ID that you saved from Luno.

c. **API Secret:** Enter the Secret key that you saved from Luno.

4. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your Luno account appears on the connected accounts page along with all managed assets and their balances. Following Admin Quorum approval, transfers are available from your vault accounts, whitelisted addresses, Fireblocks P2P Network connections, and other connected accounts to your Luno account.

Enabling withdrawals from Luno
