OKCoin account

Updated 8 months ago

Configuring your OKCoin account

To configure your OKCoin account to connect to Fireblocks:

1. Refer to the [OKCoin.com API Documentation](#) to learn how to generate an API key.
2. When prompted to do so, name your new API Key "Fireblocks."
3. After you confirm the validity of your new API key, copy and keep a record of the following items as you will need them when adding this exchange to your workspace:
 - API Key
 - Secret Key
 - Passphrase
 - Fund password
4. Make sure all the following permissions are checked:
 - Read
 - Withdraw
 - Trade
5. When prompted to do so, enter the following IP address:
 - 52.76.208.129

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **OKCoin**, and then complete the following fields:
 - a. **Name on Fireblocks:** Enter the name you want to give this exchange account on Fireblocks.
 - b. **API Key:** Enter the API key that you saved from OKCoin.
 - c. **Secret Key:** Enter the Secret key that you saved from OKCoin.

 Fireblocks Help Center

Note:

The "+ Connect Account" is relevant only if you have an existent exchange account connected to Fireblocks and would like to add another one. If this is your first exchange account connection, add it by selecting "Connect Account" under the Exchanges tab.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your OKCoin account appears on the Exchanges page along with all managed assets and their balances. Following Admin Quorum approval, transfers are available from your vault accounts, whitelisted addresses, Fireblocks P2P Network connections, and other connected exchange accounts to your OKCoin account.

Enabling withdrawals from OKCoin

To enable exchange account withdrawals, see [this procedure](#).
