OKX (OKEx) account - API V5

Updated 5 months ago

Note

Make sure to connect to your OKX global account using okx.com, not an EU or Singapore-based account using my.okx.com.

OKX accounts opened with OKX's Bahamas entity are supported by Fireblocks, but only withdrawals to vault accounts are supported.

Configuring your OKX account

To configure your OKX Unified account to connect to Fireblocks:

1. Go to [OKX.com](https://okx.com) and log in to generate an API key.
2. When prompted, name your new API Key **Fireblocks**.
3. Copy and keep a record of the following items:
 - API Key
 - API Secret
 - Passphrase
4. Enable the following permissions:
 - Read
 - Withdraw
 - Trade (Optional, to support transfers between trading accounts.)
5. Whitelist the following IP address: **52.76.208.129**

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected Accounts**.
2. Select **+ Connect Account**.
3. Select **OKX Unified**, select **Main Account**, and then complete the following fields:

/

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your OKX account appears on the connected account page along with all managed assets and their balances. Following Admin Quorum approval, transfers are available from your vault accounts, whitelisted addresses, Fireblocks P2P Network connections, and other connected exchange accounts to your OKX account.

Enabling withdrawals from OKX Unified

See the [OKX documentation](#) to learn more about enabling an allowlist and managing your address book.
