Paxos (ItBit) account

Updated 8 months ago

Configuring your Paxos account

To configure your Paxos account to connect to Fireblocks:

1. Contact Paxos Support and enable the following scopes for adding API Keys:

i. Read:

i. Access Crypto Address

i. funding:read_address

ii. scopeTransferReadTransfer

i. transfer:read_transfer

iii. Access Activity

i. funding:read_activity

ii. Write:

i. Create Profile Transfer

i. funding:profile_transfer

ii. Modify Crypto Address

i. funding:write_address

2. Contact Paxos Support by emailing api-support@paxos.com to confirm that using the Fireblocks Exchange Integration is enabled. Confirmation is required in order to withdraw funds from your Paxos account using the Fireblocks console or API.

3. Refer to the [Paxos.com API Documentation](#) to learn how to generate an API key.

4. When prompted to do so, name your new API Key "Fireblocks."

5. After you confirm the validity of your new API key, copy and keep a record of both the Client ID and Client secret. You will need them when adding this exchange to your workspace.

6. Make sure you enable the following options:

- transfer:read_deposit_address
- transfer:read_transfer

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **Paxos**, and then complete the following fields:
 - a. **Name on Fireblocks**: Enter the name you want to give this exchange account on Fireblocks.
 - b. **Client ID**: Enter the Client ID that you saved from Paxos.
 - c. **Client secret**: Enter the Client secret that you saved from Paxos.
 - d. Select **Connect Account**.

Note:

The "+ Connect Account" is relevant only if you have an existent exchange account connected to Fireblocks and would like to add another one. If this is your first exchange account connection, add it by selecting "Connect Account" under the Exchanges tab.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your Paxos account appears on the Exchanges page along with all managed assets and their balances. Following Admin Quorum approval, transfers are available from your vault accounts, whitelisted addresses, Fireblocks P2P Network connections, and other connected exchange accounts to your Paxos account.

Troubleshooting

If transfers from Paxos fail with an internal error:

Contact Paxos Support by emailing api-support@paxos.com and confirm that using the Fireblocks Exchange Integration is enabled. Confirmation is required in order to withdraw funds from your Paxos account using the Fireblocks console or API.
