Poloniex account

Updated 8 months ago

Warning

We have temporarily suspended our integration with Poloniex due to an API break on their end. We do not yet have a timeline for reactivating the integration.

Configuring your Poloniex account

To configure your Poloniex account to connect to Fireblocks:

1. Refer to the [Poloniex.com API Documentation](#) to learn how to generate an API key.
2. When prompted to do so, name your new API Key “Fireblocks.”
3. After you confirm the validity of your new API key, copy and keep a record of both the API Key and Secret. You will need them when adding this exchange to your workspace.
4. Make sure you check the **Enable Withdrawals** box.
5. Under IP access restriction, select **Restrict access to trusted IPs only**, delete the 0.0.0.0 address, and then add 52.76.208.129.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **Poloniex**, and then complete the following fields:
 - a. **Name on Fireblocks:** Enter the name you want to give this exchange account on Fireblocks.
 - b. **API Key:** Enter the API key that you saved from Poloniex.
 - c. **Secret:** Enter the Secret that you saved from Poloniex.
 - d. Select **Connect Account**.

Note:

the [Fireblocks](#) workspace appears on the [Exchanges](#) page and you can create and manage relationships between your workspace and from your workspace.

Your Poloniex account appears on the [Exchanges](#) page along with all managed assets and their balances. Following Admin Quorum approval, transfers are available from your vault accounts, whitelisted addresses, Fireblocks P2P Network connections, and other connected exchange accounts to your Poloniex account.

Enabling withdrawals from Poloniex

To enable exchange account withdrawals, see [this procedure](#).
