Backup & Recovery

Native workspace key backup solution

Settings & Configuration

Overview

Select **Settings** on the left menu to open the Settings page. Here you can configure the utility to meet your organization's recovery requirements.

Recovery Utility Settings

Reset

After recovering your private key material, select **Reset Workspace & Keys** to purge the workspace and delete the keys from your machine's memory. This does not delete any files on the machine's drive.

Auto Reset (minutes)

After the specified number of minutes of inactivity, the Recovery Utility will automatically purge the workspace and any workspace data stored in your machine's memory.

You can change this value to fit your organization's needs. Simply enter the new value, then select **Save**.

Recovery Relay (Base URL)

The recovery relay is a crucial part of the recovery process. The default base URL is <https://localhost>, but you can change the URL to fit your organization's needs. Simply enter the new URL, then select **Save**.

If you change the URL, remember to use the new URL when you [create a withdrawal](#).
