Supported providers & capabilities

Updated 5 days ago

Overview

Fireblocks integrates with a broad range of centralized finance (CeFi) providers and decentralized finance (DeFi) protocols. These integrations allow you to access provider services securely from within your Fireblocks workspace.

Supported providers expose their available capabilities through Fireblocks, such as account connectivity, balance visibility, transfers, trading, on- and off-ramps, Off-Exchange, and other provider-specific features. The capabilities available to you depend on the provider and the account types you connect to.

This article lists the providers currently supported on the Fireblocks provider network and highlights their key supported capabilities. Each provider entry links to a dedicated connectivity guide with provider-specific requirements.

Centralized Finance (CeFi) providers

Provider	Key supported capabilities	Connectivity guides
AlfredPay	Main account support On-ramp orders Off-ramp orders Rate provision	Alfred Pay account
Binance	Account hierarchy support Trading account balances	Binance account , Binance sub-account
