XRP Token transfers

Updated 1 year ago

In Fireblocks, we currently do not support XRP tokens which have a configured TransferRate parameter. In order to identify whether a certain token has this parameter:

1. Identify the token you want to transfer.
2. Use a public XRP Ledger explorer like [XRPSCAN - XRP Ledger Explorer](https://xrpscan.com) to view the token's details.
3. Look for the TransferRate field under the asset's Setting section. If it is present - we currently do not support this token.

Examples

- Token with TransferRate:
<https://xrpscan.com/account/rvYAfWj5gh67oV6fW32ZzP3Aw4Eubs59B>
This token has a TransferRate and is therefore not supported by Fireblocks.
- Token without TransferRate:
<https://xrpscan.com/account/rcoreNywaoz2ZCQ8Lg2EbSLnGuRBmun6D>
This token does not have a TransferRate and is therefore supported by Fireblocks.
