Freeze Workspace

Updated 18 days ago

Freeze Workspace blocks all activity in your workspace during emergencies, such as a security breach. Any Admin-level user (Owner, Admin, Non-Signing Admin, or Security Admin) can freeze the workspace, but only the Owner can request to unfreeze it.

Freezing the workspace changes everyone's [user role](#) to Viewer, including the Owner's, blocking *all* users from performing any workspace activity. The workspace still receives incoming transfers while frozen.

Freeze the workspace only when it faces imminent risk.

How to freeze a workspace

To freeze a workspace, go to **Settings > General > Freeze workspace** and select **Freeze workspace**.

How to unfreeze a workspace

To unfreeze a workspace, the workspace Owner must [submit a request to Fireblocks Support](#).
