Minimum transaction amounts

Updated 3 months ago

The following is a list of blockchains and their minimum amounts allowed for a single transaction due to the underlying blockchain's limitations:

- Bitcoin: 0.00000582 BTC
- Bitcoin Cash: 0.00000582 BCH
- Algorand: 0.000001 ALGO
- Cardano: 1 ADA
- Litecoin: 0.00000582 LTC
- Dogecoin: 0.01 DOGE
- Toncoin: 0.000001 TON

Notes:

1. The above minimum values are dependent on each mainnet and testnet blockchain. They are not limitations placed by Fireblocks.
2. Transactions that attempt to transfer less than the allowed amount will fail and display the status [Amount Too Small](#).

All other blockchains and tokens

The minimum transfer amount for any asset not mentioned above is based on the token's decimal limit. You can find the maximum decimal places for a token by [retrieving a list of supported assets in your workspace via the Fireblocks API](#). The decimal limits shown are the maximum supported by Fireblocks, even if the underlying asset supports more.
