Reset an Admin or Signer's Recovery Passphrase

2 years ago

Before you begin

Before you can reset your recovery passphrase, you must have completed the user setup process on your mobile device and linked it to your workspace.

Resetting an Admin or Signer's recovery passphrase

To reset your recovery passphrase as an Admin or Signer:

1. In the Fireblocks mobile app, tap **Settings** > **Change Passphrase** (Android) or **Settings** > **Reset Recovery Passphrase** (iOS).
2. Enter your Fireblocks mobile app PIN.
3. On the Reset Recovery Passphrase window, tap **Enter passphrase**. Create a new recovery passphrase that meets the minimum security requirements, then tap **Continue**.
4. Confirm your recovery passphrase, then tap **Continue**.
5. Use biometric authentication to complete the process. Your new recovery passphrase can now be used in a future Key Share Recovery scenario.
