Native workspace key backup solution

About the Fireblocks Recovery Utility

Overview

The [Fireblocks Recovery Utility](#) provides a simplified approach to generating a recovery package and recovering and verifying your workspace key.

You can use the Recovery Utility to do the following:

- Generate or use key pairs as part of the Console key backup generation process
- Verify your key backup package
- Recover your workspace private key in the event of a disaster
- Withdraw assets
- Recover Embedded Wallets key shares

Download the Recovery Utility

You can [download the Recovery Utility application from the Fireblocks Console](#). The Recovery Utility supports the following operating systems:

- macOS (M1-M4 chipset)
- Ubuntu (v20.04 LTS or higher; v22.04 requires installing libfuse2 to run AppImages)

Warning

Ubuntu v24.04 is not currently supported due to an issue with AppArmor. We will update this article after the issue is resolved by AppArmor.

- For more information on the Recovery Utility, see [online support](#).
- If needed, you must run the Recovery Relay on an online machine to enable withdrawals.

Are you having issues?

If you experience any issues while using the Recovery Utility, [submit a request to Fireblocks Support](#). To expedite the process, please include the relevant logs located in the following directory:

<homedir>/Library/Logs/Fireblocks Recovery Utility
