Changing your AML policy

Note

The AML integration is a premium feature that requires an additional purchase. Reach out to [your Customer Success Manager](#) if you do not have an agreement with an AML provider or you need help enabling the feature.

1. Go to **Settings > Compliance**, and select your AML provider.
2. Select **Change policy**  for the policy you want to change.
3. Upload the .csv file with your new policy, and select **Upload policy**.
4. Fireblocks Support will review your policy and reach out to you with any questions they have.
5. Once approved, Fireblocks Support enables the new policy in your workspace and you can view it in your Console.
