Default Deposit Control and Confirmation Policy

Updated 2 months ago

Overview

Your workspace automatically uses the default Deposit Control and Confirmation Policy. Depending on the blockchain, the default policy the number of confirmations described below.

Ethereum Classic

372 confirmations are required for all transactions made on the Ethereum Classic blockchain network. As this blockchain network is subject to a 51% risk of attack, we recommend a high amount of confirmations.

Blockchains with a finality property

See the [Blockchain confirmation limitations](#) article for more information.

All other blockchains

For all other blockchain networks, all deposits, including transfers between Vaults, require 1 confirmation.

Contract call operations

Fireblocks recommends configuring contract call operations with a minimum of 3 confirmations.
