Edit a Policy

Updated 5 months ago

Overview

The Policy Editor, located in the Fireblocks Console, is a tool to manage your organization's Policies. Access it from the **Policies** option in the left navigation panel. Before getting started, make sure you have reviewed [About Policies](#) and how to [Create a Policy rule](#). You can also watch the video below:

You can use the Fireblocks Console to edit your active Policies by submitting rule changes for approval and publication.

Generally, changes to your Policy rules only apply to transactions submitted after the changes are approved. Transactions already in progress will have the Policy rules active at the time of submission applied to them. In some cases, such as with AML screening, the transaction may not reach your Policies instantly, so the new Policy rules would be applied instead.

Additionally, please note the following:

- Only your workspace Owner or other Admin-level users can edit your Policies.
- Policies can only be edited by one person at any given time.

viewing drafted changes

When editing a Policy, you can review the drafted rule changes. In the top-left corner, you can see if other Admins drafted changes in the same timeframe that may conflict with yours.

- Added rules appear with a green badge.
- Deleted rules are grayed out with diagonal stripes.
- Edited rules include a button to expand the rule to compare the old and new versions. Modified parameters are shaded in gray.
- Moved rules appear in their new position and are deleted from their old position.

Transfer policy Valid Publish policy

3 rules Draft Last edited by Liam Morgan on May 16, 2025 at 19:14. Watch policy tutorials Load previous policy Discard changes + Add rule

Status	#	Name	Initiator	Signer	Source	Destination	Amount	Asset	Action
Edited	01	Vault to vault for funding	Anyone	Initiator	Any vault account	Any vault account	Unlimited USD per transaction	All	Allow
Previous		Vault to vault	Anyone	Initiator	Any vault account	Any vault account	Unlimited USD per transaction	All	Allow
Deleted	02	Cash vault for vault	Anyone	Initiator	Any vault account	Vaults - Third-Party Accounts	Unlimited USD per transaction	All	Block
Added	03	Liam vault to vault second	Auto-refueling	Initiator	Vault - Default	Any vault account	Unlimited USD per transaction	All	Block
	04	Default transfer rule	Anyone	Initiator	Any	Any	Unlimited USD per transaction	All	Block

Important

Only one user can edit a Policy at a time. If you don't exit the Policy Editor, your Owner and other Admins will be prevented from editing that specific Policy. To limit this possibility, you will be automatically timed out of the Policy Editor after 30 minutes of inactivity.

Editing a rule

You use the Policy Editor each time you edit or add a rule.

1. In the Fireblocks Console, select **Policies** in the left navigation panel.
2. Select the Policy type (e.g., Transfer or Contract Call), then select **Edit policy**.
3. Hover over the rule you want to change, then select **More Actions (...) > Edit**.
4. Change the rule's parameters as necessary, then select **Save rule**.
5. Select **Publish policy** to submit your changes to the approval group assigned to Policy changes.

Deleting a Policy rule from a Policy draft

Follow the [same steps above](#), but in Step 3, select **More Actions (...)** > **Delete**.

Note

To delete all drafted rules, select **Discard changes** at the top-right when editing the Policy. However, this *deletes all drafted changes* to the Policy, not just your drafted changes.

Loading a previous Policy as a draft

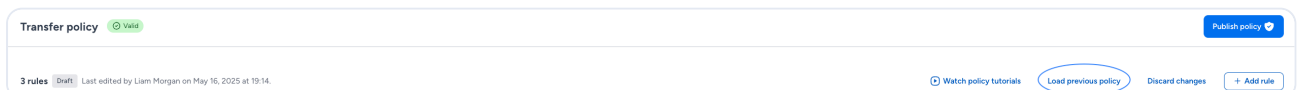

Once you have implemented multiple versions of your Policy, a new option appears that allows you to load your most recent previously approved Policy as a draft. Loading a previous Policy will open it as a draft in the Policy Editor. Then, your assigned approval group must approve restoring the policy.

Note

You can only restore your most recent Policy when no pending Policy changes are waiting for approval.

To restore your most recently approved version of a Policy:

1. Under **Policies**, select the appropriate Policy type, then select **Edit policy**.
2. Select **Load previous policy**.

Your current draft will be discarded and replaced with a draft of the previously published policy.

Published on May 15, 2025 17:10 by Liam Morgan

Cancel

Load policy

- The previous Policy loads as a draft. Restoring your previous Policy will discard any unsubmitted Policy drafts. If restoring your previous policy returns any error or warning indicators, review them and make edits as needed.

- Publish your restored Policy.

Next steps

- [Publish a Policy](#) - Submit your changes for approval and activate your rules
- [Policy Best Practices](#) - Follow recommendations for effective Policy management
- [Policy Rule Parameters](#) - Reference guide for all available parameters
- [Policy Rule Examples](#) - Review some common use cases
- [Policy Rule Error Messages](#) - Troubleshoot error messages when creating or editing rules
