AML: Overview

Transaction screening operations

Note

The AML integration is a premium feature that requires an additional purchase. Reach out to your Customer Success Manager if you do not have an agreement with an AML provider or you need help enabling the feature.

View frozen asset balances

1. In the Fireblocks Console, go to the Accounts or Assets page.
2. Find the vault account containing the frozen asset, and then hover over the frozen icon to view the frozen asset balance.
3. Alternatively, you can view the current page's total frozen asset balance on the right.

The screenshot displays the Fireblocks Accounts page. The top navigation bar shows 'Accounts \$236,899.59'. Below this, there's a table of vaults. One vault, 'Karinia Demo Account', has a 'Frozen' icon next to its balance of \$658.14. A tooltip for this icon shows 'Frozen \$228.72'. On the right side, a summary card shows 'Total \$80K' and a 'Frozen \$416.13' section. A pie chart below this shows the distribution of assets across different vaults.

Vault Name	Balance	Frozen Balance
Michael Vault	\$67,393.52	
KC DEMO	\$5,842.95	
Kobi B - WC	\$1,817.97	
Main Account	\$1,025.37	
Fireblocks Defi Wallet	\$967.1	
DIAMN	\$658.14	\$228.72
Karinia Demo Account	\$658.14	
Miner	\$520	
Customer 6	\$516.71	
Iya	\$257.45	
Stuart	\$96.98	
Customer 78 - 1800	\$48.05	
Network Deposits	\$42.41	
Alex CHESSE_demo	\$40.3	
Demo - J	\$11.08

2. Find the transaction and expand its details to view its AML information.

Export AML info from your Transaction History

1. In the Fireblocks Console, go to the Transaction History page.
2. Select **Download Log** to download a CSV file containing your transaction history.
3. Open the CSV file in your spreadsheet software and filter by the transaction hash or address.

View transactions with frozen assets by filtering

1. In the Fireblocks Console, go to the Transaction History page.
2. Select **Filters**.
3. Under the Destination heading, select **Vault**.
4. In the **Status** field, enter **Rejected**.
5. Select **Filter transactions**.
6. Expand the details of each transaction to view its AML information.

View rejected outgoing transactions by filtering

1. In the Fireblocks Console, go to the Transaction History page.
2. Select **Filters**.
3. Under the Source heading, select **Vault**.
4. In the **Status** field, enter **Rejected**.
5. Select **Filter transactions**.
6. Expand the details of each transaction to view its AML information.

View a transaction's AML screening status

1. In the Fireblocks Console, go to the Transaction History page.

Link to your AML provider

1. In the Fireblocks Console, go to the Transaction History page.
2. Find the transaction and expand its details.
3. Next to the **AML Results** field, select **Link** .

Note

This operation is not available for transactions that have failed the transaction screening process or outgoing transactions that have been rejected by your AML provider or canceled.

Rescreen an incoming transaction

Rescreening a transaction resubmits its details to your AML provider. Your AML provider then reviews the details and returns an updated verdict. This is available for incoming transactions with any vault account in your workspace as a destination.

1. In the Fireblocks Console, go to the Transaction History page.
2. Find the incoming transaction and expand its details.
3. Select **Rescreen transaction**.

Transaction type	Token name	Fireblocks transaction ID	Exchange transaction ID	Service fee:	Value (USD)
Transfer	Algorand Test	0c844564-f6e7-4e6e-860a-4478650b1dd1	0.5c54b792-7725-58ed-a9d2-b42ca7877dea.1f162bd14-1873-4383-b96f-265f223b6fe	0.03	\$0.38

Fireblocks Fireblocks Help Center

/

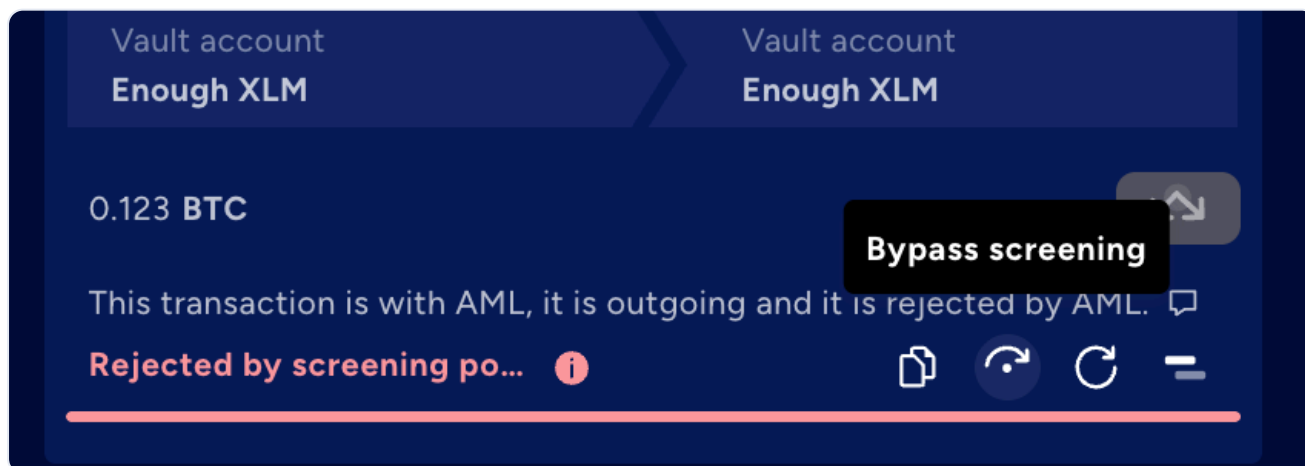

Note

You can only rescreen incoming transactions that have failed the transaction screening process or have been rejected by your AML provider. If the transaction is frozen or bypasses failure for any reason, it can't be rescreened. Outgoing transactions can't be rescreened.

Send a rejected outgoing transaction

1. In the Fireblocks Console, go to the Transaction History page.
2. Find the transaction and expand its details.
3. Select **Bypass screening**.
4. Select **Submit** on the confirmation dialog.

Note: You can also bypass screening directly from the Recent Activity panel:

Transactions with statuses failed AML screening

- Transactions with other status or substatus combinations cannot be bypassed.
- Only Owners and Admins can send outgoing transactions that have been rejected by your AML provider.

Unfreeze funds in a rejected incoming transaction

1. In the Fireblocks Console, go to the Transaction History page.
2. Find the transaction and expand its details.
3. Select **Unfreeze funds**.
4. Select **Submit** on the confirmation dialog.

Note: You can also unfreeze funds directly from the Recent Activity panel:

Only transactions automatically frozen by your AML, Travel Rule, or Auto Freeze policies can be unfrozen using the Console. You can also unfreeze funds using the Fireblocks API's [Unfreeze a transaction](#) endpoint.

Transactions manually frozen via the API cannot be unfrozen using the Console. They must be unfrozen via the API.

View the reason a transaction bypassed screening

1. In the Fireblocks Console, go to the Transaction History page.
2. Find the transaction and expand its details.
3. Next to the **AML Results** field, hover over the **Bypassed** text to view the bypass reason.

Receive notifications about AML events in your workspace

1. In the Fireblocks Console, go to **Settings** > **Notifications**.
2. Select the channel (email, Slack, or webhook) from which you want to receive notifications.
3. In the **Enable** column, toggle on AML events.

[Learn more about the Notification Center.](#)

View AML events in your workspace

1. In the Fireblocks Console, go to **Settings** > **Audit Log**.
2. Select **Filter** on the **Event** column, then enter **AML** in the **Filter by** field.
3. Select **Filter**.

[Learn more about the Audit Log.](#)

Export a list of AML events from your workspace

View AML results on the Fireblocks mobile app for signing

1. On your mobile device, the notification shows the transaction's source, the asset, the amount being transferred, the transaction's destination, and the risk score determined by your AML provider (e.g., "AML Risk: 10" or "AML Risk: High").
2. Tap the transaction's destination to view additional transaction details, including additional AML information.
