About Compliance

Travel Rule Transaction Screening Policy

Note

The Travel Rule integration is a premium, opt-in feature that requires an additional purchase. Contact your [Customer Success Manager](#) for more information.

Overview

The Transaction Screening Policy allows you to define which transactions to screen.

Default policy vs. custom policy

By default, the Transaction Screening Policy screens all your transactions except:

- If the transaction is part of an unsupported route.
- If the transaction includes an unsupported asset.
- If no initial Travel Rule information is included with the transaction.
- If AML screening is bypassed or not activated for your workspace.

Default policy

However, you can add a custom policy that defines which transactions are screened. Policies operate on a first-match basis rule set. This means the first rule that matches the transaction's parameters is applied to the transaction, and the action specified in the rule is performed.

Building your Transaction Screening Policy

You can create and customize your Travel Rule Transaction Screening Policy using the steps below.

CSV Policy Upload

To get started:

1. Download the [Transaction Screening Policy template](#) and read the instructions on the Instructions tab.
2. Use the following [rule parameters](#) to build and customize your Travel Rule Screening Policy rules.

Alternative: Compliance Policy Editor (Early access)

Important:

This feature is not yet available to all customers. Contact your [Customer Success Manager](#) to learn more.

To get started, in your Fireblocks Console:

1. Navigate to **Policies > Compliance policies > AML**.
2. Connect to your provider by following the prompts.
3. Once connected, you can begin right away with the default screening rules that are automatically enabled.
4. You can also use the [Policy Editor](#) and [advanced configuration settings](#) to build your custom AML Screening Policy rules following the [rule parameters](#) below.

Rule parameters

Source

This is the transaction's source. You can select one of the following values:

- Any
- Vault Account (e.g., Default vault account)

Don't see what you're looking for? Log in for the full Help Center experience

 Fireblocks Help Center

/

- Any Network connection

Sources must already be configured in your workspace for the rule to apply.

Source Subtype

When you select a specific source type, such as **Vault Account** or **Exchange**, you must enter the name of the source in this field.

Leave this field blank when you select an “Any” source type.

Destination

This is the transaction’s destination. You can select one of the following values:

- Any
- Vault Account (e.g., Default vault account)
- Any Vault Account
- Exchange (e.g., Binance, Coinbase)
- Any Exchange
- Network connection
- Any Network connection
- Any Unmanaged Wallet
- [One-Time Address](#)

Destinations must already be configured in your workspace for the rule to apply.

Destination Subtype

When you select a specific destination type, such as **Vault Account** or **Exchange**, you must enter the name of the destination in this field.

Leave this field blank when you select an “Any” destination type.

Amount/AmountUSD

This is the asset quantity or dollar amount that a transaction’s value must be higher than to trigger the rule. You can enter one of the following values:

- **Amount:** The quantity of an asset. When you create rules using asset amounts, this field’s asset value and the Asset field’s value must match (e.g., > 0.01 ETH, ETH).
- **AmountUSD:** The US dollar amount (e.g., > \$200).

Asset

Action

This is the action Fireblocks performs when the rule is triggered. Select one of the following:

- **Screen:** The transaction’s details are sent to Notabene to determine Travel Rule compliance.
- **Bypass:** The transaction is not screened and is automatically accepted.
- **Freeze:** Freeze the transaction’s assets in your workspace so they cannot be spent. Remember, transactions frozen by this action can only be unfrozen manually by an Admin-level user.

Comments

This field is optional. Use it to add any rule-specific information you want Fireblocks Support to be aware of when you submit your policy for review and implementation.

Example policy

Important

We provide you with an example of a Travel Rule Transaction Screening Policy below to demonstrate its capabilities and formatting. However, we will not provide a policy for you to copy and use.

If you need assistance building a policy, we recommend contacting Notabene. They may have compliance experts as part of their team to assist you.

Rule No.	Source	Destination	Amount	Asset	Action
1	Vault	Vault	Any	Any	Pass
2	Any	Default Vault Account	>\$100	Any	Screen
3	All Binance Accounts	Vault #2	Any	BTC	Screen
4	Any	Any	Any	Any	Pass

- or screen any incoming BTC transactions from any finance account to the vault account.
- 4. Skip screening on all other transactions.

Uploading your Transaction Screening Policy - CSV Policy

To upload your workspace’s Travel Rule Transaction Screening Policy, go to **Settings > Compliance > Travel Rule**. Then select **Change policy**  in the Screening row, and upload the template with your custom policy.
