Automation rule example: rebalance

Updated 1 year ago

Note

Automation is a premium feature that requires an additional purchase. If you don't have access to this feature, contact your [Customer Success Manager](#) to discuss enabling it in your Fireblocks workspace. [Learn more about Automation.](#)

Overview

This guide explains how to create an Automation rule in Fireblocks that rebalances accounts. This allows you to compare balances between accounts and transfer assets to maintain a specific ratio or value. Multiple triggers and conditions are available for this action. The example below shows how to set up a rule for weekly rebalancing.

Creating an Automation rule for rebalancing between two accounts

The following parameters are suggestions for this rule. Adjust them to suit your needs.

1. In the Fireblocks Console, go to the Automation page and select **Create automation**.
2. Enter a name for the rule in the top-left corner.
3. Select **Time** as the trigger.
4. Select an **Interval** and its **frequency**. The example below triggers the automation once per week on Monday at 4:00 AM.
5. Select **Save changes** to edit the condition.

6. Select **Balance** for the condition.
7. Select **Percentage**.
8. Select an **Account**, an **Asset**, its **amount**, and the accounts to compare it to. In the example below, the automation will run if the BTC balance of the Bitmex account is 60% or less than the sum of the combined Bitmex and Binance Europe BTC balance.
9. Select **Save changes** to edit the action.
