Automation rule example: top up

Updated 10 months ago

Note

Automation is a premium feature that requires an additional purchase. If you don't have access to this feature, contact your [Customer Success Manager](#) to discuss enabling in your Fireblocks workspace. [Learn more about Automation.](#)

Overview

This guide explains how to create an Automation rule in Fireblocks that tops up an account. This allows you to transfer assets to maintain a specific asset or dollar value. Multiple triggers and conditions are available for this action. The example below shows how to set up a rule that checks a vault account daily and tops it up if the balance is below the set amount.

Creating an Automation rule for topping up an account

The following parameters are suggestions for this rule. Adjust them to suit your needs.

1. In the Fireblocks Console, go to the Automation page and select **Create automation**.
2. Enter a name for the rule in the top-left corner.
3. Select **Time** as the trigger.
4. Select an **Interval** and its **frequency**. The example below triggers the automation every day at 8:00 PM.
5. Select **Save changes** to edit the condition.

6. Select **Balance** for the condition.
7. Select **Specific amount**.
8. Select an **Account**, an **Asset**, and its amount. In the example below, the automation will run if the BTC balance of the selected vault account is less than \$50,000.
9. Select **Save changes** to edit the action.

10. Select **Top up** for the action.
11. Select an **asset**, the source account, and the destination account to top up. If a destination vault does not have a wallet for the selected asset, one will be created automatically if the source account has a sufficient balance to trigger a transaction. In the example below, the rule will top up BTC to \$100,000 between two selected vault accounts.
12. Select **Save**, then [enable it](#) like any other automation rule.
