Automation rule statuses

Updated 1 year ago

Note

Automation is a premium feature that requires an additional purchase. If you don't have access to this feature, contact your [Customer Success Manager](#) to discuss having it enabled in your Fireblocks workspace.

- **Processing:** The rule was triggered and is being processed.
 - For example, the rule's condition is being evaluated or the action is being initiated.
- **Completed:** The rule was triggered and processed successfully.
 - For example, the rule's condition was evaluated but not met or the rule's action was successfully initiated.
- **Failed:** The rule was triggered but failed to process. You can review the rule's [recent run history](#) to determine why the rule failed to process.
 - For example, the rule's condition failed to be evaluated or the action failed to initiate due to insufficient funds in the vault account.
