Bridge account

Updated 3 months ago

Overview

By connecting your Bridge account to Fireblocks, you can on-ramp stable coins with near-instant settlement and reduced fees compared to traditional banking rails. See the [Bridge documentation](#) for supported assets and currencies.

Note:

You must reach out to Bridge in order to enable the integration with Bridge before connecting the account.

To configure your Bridge account to connect to Fireblocks:

1. Log into your Bridge dashboard.
2. Generate your API Key directly there.
3. If you do not yet have a Bridge developer account, sign up and complete the onboarding process, including KYC verification for new customers.
4. After generating your credentials, keep a secure record of the API Key. You will it when adding this account to your Fireblocks workspace.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.
2. Select **+ Connect Account**.
3. Select **Bridge**, and then complete the following fields:
 - **Name on Fireblocks:** Enter the name you want to give this account on Fireblocks.
 - **API Key:** Enter the API key that you generated in the Bridge Dashboard.
4. Select **Connect Account**.

orders through Bridge.

To transfer fiat to Bridge send funds from an external bank account. Once Bridge confirms receipt of the fiat transfer, it delivers the corresponding stablecoins to your Fireblocks workspace.

For more information, see the [Bridge documentation](#).
