Coinbase international account

Updated 8 months ago

Configuring your Coinbase international account

To configure your Coinbase international account to connect to Fireblocks:

1. Refer to the [Coinbase international documentation](#) to learn how to generate a Coinbase international API key.
2. When prompted to do so, name your new API Key "Fireblocks" and create a passphrase. Note that passphrases can be no longer than 23 characters.
3. After you confirm the validity of your new API key, copy and keep a record of both the API Key and API Secret. You will need them when connecting this account to your workspace.
4. Optionally, whitelist the following IP address: **52.76.208.129**.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **Coinbase International** and then complete the following fields:
 - a. **Name on Fireblocks:** Enter the name you want to give this exchange account on Fireblocks.
 - b. **API Key:** Enter the API Key that you saved from Coinbase international.
 - c. **API Secret:** Enter the API Secret that you saved from Coinbase international.
 - d. **Passphrase:** Enter the API Passphrase that you created in Coinbase international.
 - e. **Fundable portfolio:** Enter the portfolio ID of the portfolio on which deposits and withdrawals will be enabled via Fireblocks.
 - f. Select **Connect Account**.
