Connecting a BCB Group BLINC account

Updated 8 months ago

Overview

Connecting a BLINC account allows you to send, receive, and manage fiat currency directly from your Fireblocks workspace.

BLINC accounts can hold and transfer:

- Euro (EUR)
- US dollar (USD)
- Canadian dollar (CAD)
- Swiss franc (CHF)
- British pound sterling (GBP)
- Japanese yen (JPY)
- Singapore dollar (SGD)

Notes:

1. We support the BLINC test environment. To select it, go to **Fiat > + Connect Account > BLINC Test**.
2. Each fiat currency requires a separate BLINC account. You can connect multiple BLINC accounts to your workspace.

Before you begin

Make sure you have an active BLINC account before you continue the connection process. Then contact BCB Support and request your BLINC account API subscription token. The BCB Support team will guide you through the consent process and provide your subscription token.

1. Go to **Accounts > Fiat**.
2. Select **+ Connect Account**.
3. On the Connect Fiat Account dialog, select **BLINC**.
4. Complete the following fields:
 - **Name on Fireblocks:** Enter the name you want to give the BLINC account in your workspace.
 - **Subscription Token:** Enter the token you received from BLINC Support.
 - **BLINC Account ID:** Enter your BLINC Account ID number.
5. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers in your workspace.

Transferring funds with BLINC

After you connect your BLINC account to your Fireblocks workspace, you can [transfer](#) BLINC funds to exchanges that support BLINC assets and whitelisted BLINC addresses. All transfers to and from your connected BLINC accounts will appear in the Recent activity panel and your Transaction History.

Managing BLINC assets

Go to **Assets** in the Fireblocks Console to manage all BLINC assets you control. This includes BLINC assets you currently hold in supported exchange accounts.

Whitelisting BLINC account addresses

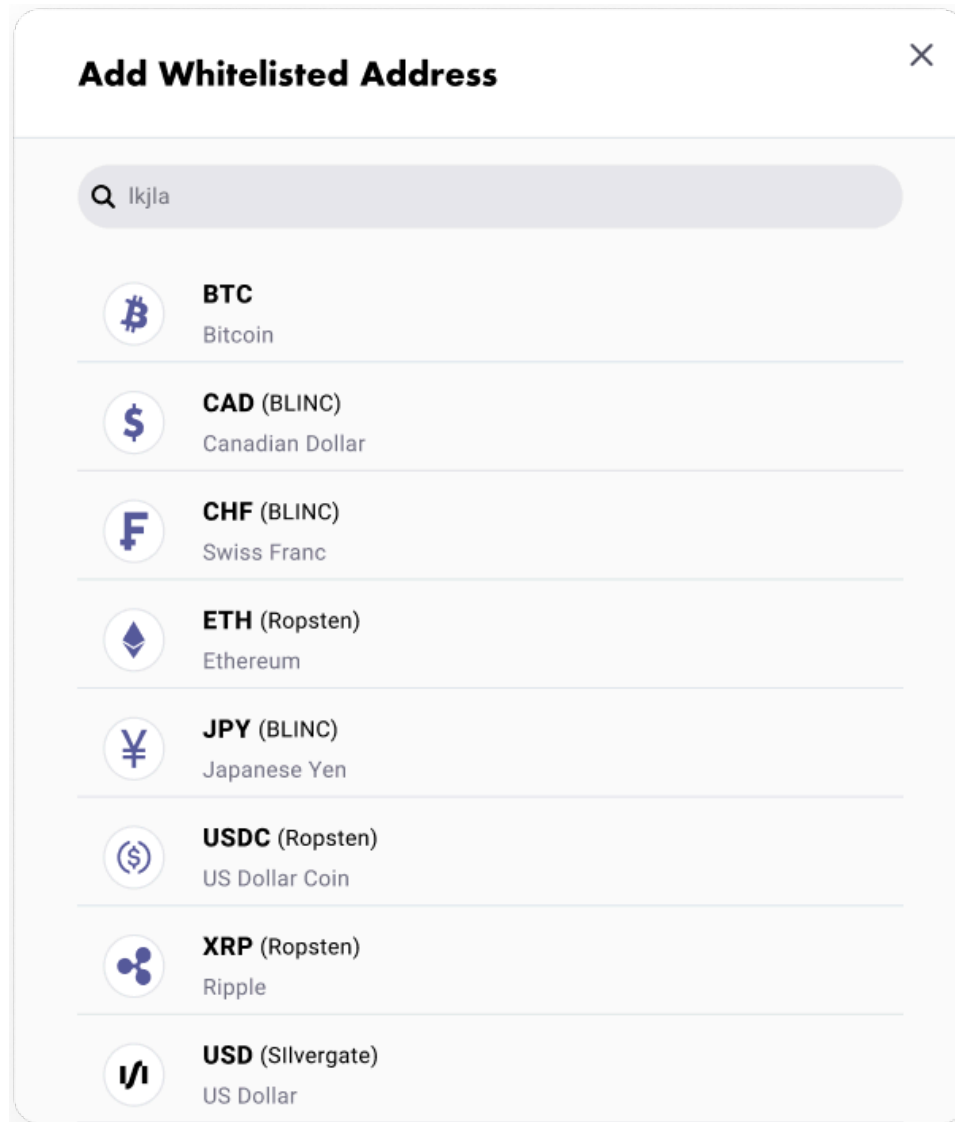

BLINC wallet IDs can be whitelisted like any other external address. Whitelisted addresses are useful for transferring funds to counterparties that are not connected via the Fireblocks P2P Network.

2. Select a wallet from the list to add a new whitelisted address to that wallet.
3. Select **+ Whitelisted Address** in the top right-hand corner. If the wallet is empty, select **Add Address** in the center of the page.
4. Select the **Asset**.

5. Enter the **BLINC Account ID**.
6. Enter the **Bank Transfer Description**. The bank transfer description can be any plain text and is required.
