Enable the Gas Station

Updated 3 days ago

Newer workspaces use Gas Station 2.0

If your workspace was created in January 2024 or later, refer to the [Gas Station 2.0 setup documentation](#).

To enable the Fireblocks Gas Station for your workspace, contact Fireblocks Support. After enablement, Fireblocks automatically creates two new items in your workspace:

- **EVM Gas Station:** A [Fireblocks P2P Network](#) connection
- **Gas Station Wallet:** A whitelisted internal wallet

The EVM Gas Station connection requires approval according to your workspace [Admin Quorum](#) settings. Admins provide this approval using the Fireblocks mobile app. The connection is not visible on the Network page.

If the Fireblocks P2P Network isn't enabled in your workspace, Fireblocks creates only the Gas Station Wallet, which doesn't require approval.
