Gemini account

Updated 8 months ago

Configuring your Gemini account

To configure your Gemini account to connect to Fireblocks:

1. Refer to the [Gemini.com API Documentation](#) to learn how to generate an API key.
2. When prompted to do so, name your new API Key "Fireblocks."
3. After you confirm the validity of your new API key, copy and keep a record of both the API Key and Secret Key. You will need them when adding this exchange to your workspace.
4. Make sure you modify the following API Key Settings:
 - Check **Fund Management**.
 - Leave the remaining options blank.
5. Whitelist the following Fireblocks IP addresses: 52.76.208.129, 40.117.39.160.

Configuring Fireblocks

1. Go to **Accounts > Connected accounts**.
2. Select **+ Connect Account**.
3. Select **Gemini**, and then complete the following fields:
 - a. **Name on Fireblocks**: Enter the name you want to give this exchange account on Fireblocks.
 - b. **API Key**: Enter the API key that you saved from Gemini.
 - c. **Secret Key**: Enter the Secret key that you saved from Gemini.
 - d. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Whitelisting Fireblocks addresses on Gemini

1. In the Fireblocks Console, go to **Accounts**.
2. Find and open the vault account that will receive withdrawals from Gemini.
3. Find the asset in the vault account that you would like to whitelist.
4. Select **See Deposit Addresses** from the row menu.
5. Look for the Permanent address, and copy the address using the Copy address  button.
6. Paste the deposit address and its asset type into a new email, and send it to institutional@gemini.com with instructions to whitelist the address for withdrawals.
