HitBTC account

Updated 8 months ago

Configuring your HitBTC account

To configure your HitBTC account to connect to Fireblocks:

1. Refer to the [HitBTC.com API Documentation](#) to learn how to generate an API key.
2. When prompted to do so, name your new API Key “Fireblocks.”
3. Copy and keep a record of both the API Key and Secret Key. You will need them when adding this exchange to your workspace.
4. Make sure you enable the following options:
 - **Order book**
 - **Payment information**
 - **Withdraw cryptocurrencies**
5. Optionally, whitelist the following IP address: 52.76.208.129.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.
2. Select **+ Connect Account**.
3. Select **HitBTC**, and then complete the following fields:
 - a. **Name on Fireblocks:** Enter the name you want to give this exchange account on Fireblocks.
 - b. **API Key:** Enter the API key that you saved from HitBTC.
 - c. **Secret Key:** Enter the Secret key that you saved from HitBTC.
 - d. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.
