N.Exchange account

Updated 4 months ago

Overview

N.exchange is a digital asset exchange that supports account balance visibility, customer-to-customer (C2C) bridging, and rate queries. You can connect your N.exchange account to your Fireblocks workspace to enable supported capabilities using N.exchange's API.

Configuring your N.exchange account

To connect N.exchange to Fireblocks, you must generate API credentials in your N.exchange account.

1. Sign in to your account at N.exchange.
2. Navigate to your profile page.
3. Generate a set of Fireblocks Swaps API credentials.
4. Copy and securely store the API Key and API Secret.

If the location or naming of these settings differs in the N.exchange interface, follow N.exchange's documentation or contact N.exchange support to complete the equivalent steps.

Configuring Fireblocks

To connect N.exchange to your Fireblocks workspace:

1. In the Fireblocks Console, go to **Accounts > Connected accounts**.
2. Select **Connect Account**.
3. Select **N.exchange**.
4. Enter the **API Key** and **API Secret** generated in N.exchange.
5. Select **Connect Account**.
