OKX (OKEx) - API V5 sub-account

Updated 5 months ago

Overview

Fireblocks supports OKX sub-accounts via exchange connectivity. First, connect your main account to your workspace, and then connect a sub-account to rebalance securely between them.

Important

You may need to modify your Fireblocks Policies to support sub-account transfers.

Configuring your OKX Unified sub-accounts

To configure your OKX Unified sub-account to connect to Fireblocks:

1. Go to [OKX.com](https://www.okx.com) to create a sub-account API Key.
2. Make sure you enable the following permissions:
 - Read
 - Trade
3. Enter a passphrase and keep a record of it. You will need it when adding this exchange to your workspace.
4. Whitelist the following IP address: **52.76.208.129**
5. Copy and keep a record of the Access key and Secret key. You will need it when adding this exchange to your workspace.

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select OKX, select the Sub-Account tab, and then follow these steps:.

Fireblocks Help Center

- f. **Sub-Account name:** Enter the Sub-Account Name as entered on OKX.
- g. Select **Connect Account**.

The [Admin Quorum](#) must approve the new account to make it available for new transfers from your workspace.

Your OKX sub-account will be displayed on the connected accounts page along with all managed assets and their balances. Following admin quorum approval, transfers will be available between this sub-account and its linked OKX main account.
