Set Up the Gas Station

Updated 3 days ago

Newer workspaces use Gas Station 2.0

If your workspace was created in January 2024 or later, refer to the [Gas Station 2.0 setup documentation](#).

This article describes how to set up the Fireblocks Gas Station in your workspace after Fireblocks Support enables the feature.

Set up the Gas Station

1. If you receive a Gas Station network connection approval request in the Fireblocks mobile app, approve it.
2. Confirm that a new Gas Station Wallet appears on the Whitelisted Addresses page.
3. Add a [Policy rule](#) with its destination set to the Gas Station Wallet. Make sure to apply an action (**Allow**, **Block**, or **Approved By**).
4. [Fund the asset wallets within the Gas Station Wallet](#).
5. Optionally, [edit the Gas Station settings](#). If you skip this step, the Gas Station uses its default values.
6. [Enable auto-fueling on the appropriate vault account](#).
7. To verify the setup, send a token to a vault account where the base asset value is below the configured `gasThreshold`. The Gas Station should top off the base asset in that account.
