UTXO fees: Selecting transaction fees

Updated 1 year ago

Console

To select either estimated or exact fee levels:

- a. Select **+ Transfer** or go to **Accounts > My Vault**.
- b. Select your desired source vault account.
- c. Select **Withdraw**  or **Deposit**  to initiate a new transfer.

1. In the New Transfer window, select the desired Asset.
2. Select the source account.
3. Select the destination account or address.
4. Enter the desired net or gross amount you wish to transfer.
5. Select one of the **Slow**, **Medium**, or **Fast** options per your desired fee level (parallel to Low, Medium & High), or select **Custom** and enter an exact fee.
6. Select **Create Transfer** to initiate the transfer.

API

The Fireblocks API lets you estimate blockchain and transaction fees using the following endpoints:

- [Estimate the required fee for an asset](#)
- [Estimate transaction fee](#)

Warning

You must check whether you have enough funds in the source account to pay for the estimated fees before submitting the transaction. If you do not have enough funds, the transaction may fail and you will receive the [DROPPED_BY_BLOCKCHAIN](#) error in the Console, or the [Failed: Insufficient funds for fee status](#) via the API.

Fireblocks Help Center

Testnet is often used for experimenting, and users frequently set unnecessarily high fees. This causes artificial fee spikes, which can make estimations look higher than expected. Note that you can always set a custom fee to better suit your testing needs.
