Yellow Card Account

Updated 6 months ago

[Learn more about the Yellow Card API in their official documentation.](#)

To configure your Yellow Card account and connect it to Fireblocks, follow these steps:

1. Request access to your Payments Dashboard from your dedicated support engineering team in the shared Slack or Telegram group.
2. Log in to your dashboard and navigate to the API Keys section under Developer Tools.
3. Click Create New and name your API Key "Fireblocks".
4. Enable Read and Write permissions for the API.
5. Copy and save a record of both the API key and API secret. You will need them when adding this exchange to your workspace.
6. Navigate to **Settings > Whitelisted IPs** to whitelist the following Fireblocks IP address: 52.76.208.129

Configuring Fireblocks

1. In the Fireblocks Console, go to **Accounts > Exchanges**.
2. Select **+ Connect Account**.
3. Select **Yellow Card** and complete the following fields:
4. **Name on Fireblocks**: Enter the name you want to give this exchange account on Fireblocks.
5. **API Key**: Enter the API key that you received from Yellow Card.
6. **API Secret**: Enter the API Secret that you received from Yellow Card.
7. Select **Connect Account**.

The Admin Quorum must approve the new account to make it available for new transfers from your workspace.

Your Yellow Card account is displayed on the connected accounts page, with all managed assets and their balances.
